

# AUTOMATED MENU PLANNING SUITE

The **Automated Menu Planning Suite (AMPS)** add-on module saves time and money by automatically writing menus once a master menu and the appropriate tables are built in **Hospitality Suite**. This feature is particularly time-saving for facilities that frequently change their menu cycles. AMPS can be used by a central location to generate menus for their off-site facilities, creating and managing menus at a central location in one schema for all sites. It can also be used to transfer off-site therapeutic menus to sister facilities, such as retirement homes or meal delivery programs. If you are looking for a solution to streamline menu planning and save time, look no further—Computrition's AMPS module can assist you with your menu planning needs.

## MENU PLANNING MADE SIMPLE!

## FEATURES
